

INVESTING IN THE FUTURE OF YOUR HEALTH

What we actually do? What is our goal?

Throughout a lifetime no one is safe from suffering diseases, accidents or any personal suffering through a close relative.

With your contributions and donations we are investing in the future. **We invest in the future of our health.**

We invest in medicines, medical treatments and vaccines that can cure diseases in the future. We invest in medical studies and researches so that these cures are made possible. Without medical research (and the progress achieved) our lives could not have survived as they have done throughout history.

People typically make other investments, such as social contributions and pension plans, but what are these worth if we are not healthy enough for using them? What is their value if there are no medicines or treatments to keep us healthy?

We invest in a final product: **Your Health.**
